19.	Read the article. Three things to do before you leave the planet! 1 Visit Tuvalu Tuvalu in the Pacific Ocean is the fourth smallest country in the world. Sadly, it's also only 4 metres above sea level at its highest. Because of the rise in sea levels, Tuvalu might be the first country to disappear under the waves. The islands are a paradise of beautiful tropical beaches and palm trees. Why don't you go there before they disappear? Take a plane from Fiji, stay in one of Tuvalu's four guest houses and have a drink in its one bar. Go now, before it dies. 2 See the world's largest flower Go to the jungles of Borneo or Sumatra and find the world's strangest plants, Rafflesia. For most of its life, the plant is invisible and hard to find. But to find it is amazing. It grows into the world's largest flower. It can be one metre across and weigh 10 kilos. And it smells terrible! However, it only lasts a few days. You'll be lucky to see one. 3 Find happiness Why do some people live perfectly happy lives while others find life hard? The answer might be in our genes – some people are born happy. Lucky them, I hear you say! Don't worry, there's still a lot you can do. Help other people, have lots of friends, change your job. Or move to Denmark. It's the only European country where people are happier than they were 30 years ago. Why? Go and find out! Are the sentences true or false? 1. Tuvalu is a country of islands. 2. There are lots of places where you can have a beer or a fruit juice. 3. Rafflesia grows in deserts. 4. You can't learn how to be happy. 5. People in Denmark were sadder thirty years ago. 6. Rafflesia isn't very easy to find.	1. true 2. false 3. false 4. false 5. true 6. true	6

An office suite, or productivity</p>	<p>1. false – An office suite lets you create... 2. true 3. false – OpenOffice is free to... 4. true</p>	4

suite, is a collection of programs that are sold as a package and perform essential office functions.

Application office suites usually combine a word processor, a spreadsheet program and a presentation program, but they can also contain a database manager, an email client, a web browser, Instant Messaging, collaboration groupware, and a personal information manager, or PIM, which includes a calendar, task manager, address book, and more. Each edition has its own mix of programs and utilities, and each component can be installed separately.

The most widely used office suite is Microsoft Office, a standard in office software. Depending on the edition, it includes some combination of Word, the Excel spreadsheet program, the PowerPoint presentation program, the Access database manager, the Outlook mail program, along with various internet and other utilities. Another popular proprietary suite is IBM Lotus SmartSuite, which includes WordPro, the famous Lotus 1-2-3 spreadsheet, Freelance Graphics for business presentations, Approach relational database, and Lotus Organizer.

One alternative to proprietary packages is OpenOffice, a free, open-source suite available under the GNU Lesser General Public License, which means anyone can use it or modify it for their own purposes. OpenOffice includes Writer, Calc, Impress and Draw, among other components. Other competitors are online office suites such as Google Apps and ThinkFree Office; these web-based programs allow subscribers to do the typical office things, collaborate on documents with others, and even publish to a blog or website.

The components of a suite have a consistent graphical user interface (GUI) and can exchange data with each other. The OLE (object linking and embedding) feature allows users to insert information from one program into another. The object may be linked, reflecting the changes that users make to the original, or just embedded - inserted as a static copy of the original. Objects can also be dragged and dropped between applications.

	<p>Office suites are available for most operating systems, including Windows, Linux and Mac OS. Lotus SmartSuite and OpenOffice are compatible with Microsoft Office - i.e. they can read Word or Excel files, and even save files in Microsoft formats (.doc for text documents, .xls for spreadsheets, .ppt for presentations, etc.). Office suites are reasonably secure, as long as you have an anti-virus program, and may include a document recovery tool that helps you retrieve documents after a system failure.</p> <p>1. A graphic suite lets you create documents, spreadsheets and presentations. 2. The dominant office suite is currently Microsoft Office. 3 IBM Lotus SmartSuite is free to download, use and distribute. 4 OpenOffice users can share documents with Microsoft users.</p>

38.	Read the article and complete the gaps with headings a-f. 1 Free climbing is something that takes a lot of strength and courage. It involves climbing rocks using just your hands and feet. In other words, you use ropes and equipment but these do not help you climb. Instead, they provide support if you fall. 2 In 2014, Americans Tommy Caldwell and Kevin Jorgeson became the first people to climb an extremely difficult part of the rock _____ El Capitan. The section they climbed is called Yosemite's Dawn Wall, and is about 3,000 feet high. In climbing terms, it is divided into thirty-two rope-length sections, which are known as 'pitches'. 3 Caldwell and Jorgeson's aim was to become the first climbers to free climb the complete set of thirty-two pitches. But they were also going to do it without stopping to return to the ground. What's more, they decided that if either of them did fall during a pitch, they would restart and complete that pitch before they could continue. 4 The first 14 pitches, which were said to include some of the more difficult parts of the climb, took them only six days to complete. This in itself was a personal record for them as they had never before got further than pitch 13 in the previous years of attempting to climb El Capitan. 5 Two weeks into the climb, Caldwell had managed to free climb an impressive twenty out of the total thirty-two pitches while Jorgeson was having a lot of trouble with pitch 15. For ten days he had repeatedly tried to complete this section but without success. He knew that if he couldn't complete it, Caldwell would have to continue alone. This was not something either one of the climbers wanted. 6 Fortunately, on his eleventh attempt, Jorgeson managed to finish pitch 15 and in a	1) d 2) a 3) f 4) c 5) b 6) e	

	<p>matter of days, both climbers had reached a height of 2,000 feet with only the easier climbing left above them. After an incredible nineteen days spent on the rock, the two young men succeeded in reaching the *peak of El Capitan. They had achieved their record!</p> <p>* The top or summit of a mountain.</p> <p>a) Americans conquer the Captain b) If at first you don't succeed, try and try again c) Getting past the worst of it d) Not a hobby for the faint-hearted e) Perseverance pays off f) Feet off the earth</p>		
39.	<p>Are the sentences true or false?</p> <p>1 Free climbing requires physical and mental power. 2 Tommy Jorgeson and Kevin Caldwell ascended El Capitan in 2014. 3 They agreed to reascend a pitch if either of them fell off. 4 Reaching pitch thirteen was as far as either climber had ever managed before. 5 Jorgeson took fifteen days to complete pitch ten. 6 The peak of El Capitan stood at 2,000 feet.</p>	<p>1) true 2) false 3) true 4) false 5) false 6) false</p>	
40.	<p>Choose the correct answers.</p> <p>1 In free climbing, ropes are used to _____. a) help you climb faster b) give your hands and feet a rest c) keep you safe</p> <p>2 In climbing, a 'pitch' is _____. a) an incredibly difficult climb b) the same distance as a length of rope c) one of thirty-two sections</p> <p>3 Their climb was harder because they chose _____. a) not to go back to previous pitches b) to climb the same pitch at the same time c) to complete it without leaving the rock</p> <p>4 They _____ in less than a week. a) finished the easiest part of the climb b) got the worst part of the climb behind them c) planned to complete twenty pitches</p> <p>5 Neither climber _____. a) wanted to fail at this record attempt b) could get past pitch 15 in the first fortnight c) could finish without the help of the</p>	<p>1) c 2) b 3) c 4) b 5) a 6) c</p>

53.	<p>Read the article and complete the gaps in the summary below with a number or a date.</p> <p style="text-align: center;">The Queen of Chess</p> <p>The champion chess player, Hou Yifan, was born on 27th February 1994 in Xinghua, China. She first became interested in the game when she was three and her parents bought her a chess set*. Then, at five years old, she began taking lessons with a world-famous chess tutor who encouraged her to play in local chess competitions from the age of six. These gave her experience in playing against others and improved her skill at the game. Amazingly, she won the World Youth Chess Championship for Girls when she was only ten and two years later, she became the youngest person to play in the World Women's Championships. Her success continued when in 2008, at the age of 13, she became the youngest ever Chinese chess champion and the youngest female to become a grandmaster. Then, a few years later in 2010, she won her first Women's World Championship. She also won it in 2011 and 2013 and is the only player in history who has won three world championships before the age of 20. These days, you will find her studying in the School of International Studies at Peking University as well as playing chess professionally. Her chess career still continues and in March 2015, at the age of 21, she was officially named as the best female player in the world. More recently, she nearly beat the Male World Champion, Magnus Carlsen, and many people think that in the future, she may become the world's best chess player.</p> <p><i>*The board and pieces used to play the game of chess.</i></p>	<ol style="list-style-type: none">1. three / 32. five / 53. ten / 104. 20085. three / 36. 2015	6

The new series features the world’s highest recording density in a 3.5”hard disk drive, using only three disks. The SpinPoint F1 1TB drive consists of three 334GB platters, enough space to store more that 300,000 6-megapixel images, 250,000 MP3s or 1,000 hours of standard definition video. It features a spin speed of 7,200 rpm and an average seek time of 8.9 ms. It also uses Perpendicular Magnetic Recording (PMR), a process that achieves higher storage densities and ensures recording stability. The F1 also comes with disk utilities such as formatting, partition, compression and defragmentation software. Samsung plans to sell the F1 Series for about \$390.</p>	<ol style="list-style-type: none">1. 8.9 ms2. PMR / Perpendicular Magnetic Recording3. speed and reliability4. 	<p>B. Magic storage manufacturers, such as Seagate, Samsung and Hitachi, have launched hybrid drives that integrate 1.5” magnetic hard disk with up to 256MB of on-board flash memory.</p> <p>With the hybrid HDD, manufacturers seek to combine the benefits of both technologies: magnetic hard drives offer low cost and extraordinary storage; flash memory offers speed and reliability. Flash memory is used as a non-volatile disk cache, a mechanism that allows quick access to data so that it can be retrieved faster, reducing the use of the hard disk, thus cutting power consumption.</p> <p>The first computer with a hybrid hard drive was the Samsung R55 notebook, followed by the LG R400. The new generation of PCs will probably run faster and last longer thanks to there hybrid hard drives and a feature in the Windows Vista operating system, called ReadyDrive, that uses NAND flash memory as a disk cache.</p> <p>C. Panasonic has developed a new drive capable of writing to Blu-ray discs at 4x speed. The new discs are available in both 25GB and 50GB, which allows consumers to conveniently handle large amounts of data and high-definition content.</p> <p>The Blu-ray disc system uses a blue-violet laser operating at a wavelength of 405 nm (nanometers) to read and write data. Conventional DVDs, however, use red lasers at 650 nm. A dual layer Blu-ray disc can store 50GB, almost six times the size of a dual-layer DVD at 8.5GB. Blu-ray is particularly well-suited to high-definition films and video games. Blu-ray players are backward compatible with CD/DVD formats.</p> <ol style="list-style-type: none">1. Basic office software Most businesses use office suites to create text documents, spreadsheets and presentations. An office suite, or productivity suite, is a collection of programs that are sold as a package and perform essential office functions. Application office suites usually combine a word processor, a spreadsheet program and a presentation program, but they can also contain a database manager, an email client, a web browser, Instant Messaging, collaboration groupware, and a personal information manager, or PIM, which includes a calendar, task manager, address book, and more. Each edition has its own mix of programs and utilities, and each component can be installed separately. The most widely used office suite is Microsoft Office, a standard in office software. Depending on the edition, it includes some combination of Word, the Excel spreadsheet program, the PowerPoint presentation program, the Access database	1. false – An office suite lets you create... 2. true 3. false – OpenOffice is free to... 4. true	4

	<p>manager, the Outlook mail program, along with various internet and other utilities. Another popular proprietary suite is IBM Lotus SmartSuite, which includes WordPro, the famous Lotus 1-2-3 spreadsheet, Freelance Graphics for business presentations, Approach relational database, and Lotus Organizer.</p> <p>One alternative to proprietary packages is OpenOffice, a free, open-source suite available under the GNU Lesser General Public Licence, which means anyone can use it or modify it for their own purposes. OpenOffice includes Writer, Calc, Impress and Draw, among other components. Other competitors are online office suites such as Google Apps and ThinkFree Office; these web-based programs allow subscribers to do the typical office things, collaborate on documents with others, and even publish to a blog or website.</p> <p>The components of a suite have a consistent graphical user interface (GUI) and can exchange data with each other. The OLE (object linking and embedding) feature allows users to insert information from one program into another. The object may be linked, reflecting the changes that users make to the original, or just embedded - inserted as a static copy of the original. Objects can also be dragged and dropped between applications.</p> <p>Office suites are available for most operating systems, including Windows, Linux and Mac OS. Lotus SmartSuite and OpenOffice are compatible with Microsoft Office - i.e. they can read Word or Excel files, and even save files in Microsoft formats (.doc for text documents, .xls for spreadsheets, .ppt for presentations, etc.). Office suites are reasonably secure, as long as you have an anti-virus program, and may include a document recovery tool that helps you retrieve documents after a system failure.</p> <ol style="list-style-type: none">1. 	<p>2 In 2014, Americans Tommy Caldwell and Kevin Jorgeson became the first people to climb an extremely difficult part of the rock El Capitan. The section they climbed is called Yosemite's Dawn Wall, and is about 3,000 feet high. In climbing terms, it is divided into thirty-two rope-length sections, which are known as 'pitches'.</p> <p>3 Caldwell and Jorgeson's aim was to become the first climbers to free climb the complete set of thirty-two pitches. But they were also going to do it without stopping to return to the ground. What's more, they decided that if either of them did fall during a pitch, they would restart and complete that pitch before they could continue.</p> <p>4 The first 14 pitches, which were said to include some of the more difficult parts of the climb, took them only six days to complete. This in itself was a personal record for them as they had never before got further than pitch 13 in the previous years of attempting to climb El Capitan.</p> <p>5 Two weeks into the climb, Caldwell had managed to free climb an impressive twenty out of the total thirty-two pitches while Jorgeson was having a lot of trouble with pitch 15. For ten days he had repeatedly tried to complete this section but without success. He knew that if he couldn't complete it, Caldwell would have to continue alone. This was not something either one of the climbers wanted.</p> <p>6 Fortunately, on his eleventh attempt, Jorgeson managed to finish pitch 15 and in a matter of days, both climbers had reached a height of 2,000 feet with only the easier climbing left above them. After an incredible nineteen days spent on the rock, the two young men succeeded in reaching the *peak of El Capitan. Всего 20 тестовых вопросов. Продолжительность теста – 35 минут.

4.2. Критерии оценивания промежуточной аттестации по видам оценочных средств

Тест формируется в системе электронного обучения MOODLE.

Максимальный балл за тест — 100 баллов.

Оценка	Отлично/ Зачтено	Хорошо/ зачтено	Удовлетворитель но/зачтено	Неудовлетворительно/ незачтено
Баллы	100-86 баллов	85-69 баллов	68-51 баллов	50-0 баллов
Уровень освоения проверяемых компетенций	высокий	средний	базовый	недостаточный

4.3. Результаты промежуточной аттестации и уровни сформированности компетенций

При подведении итогов учитываются результаты только промежуточной аттестации:

0-50 баллов – неудовлетворительно/незачтено;

51-68 баллов – удовлетворительно/зачтено;

69-85 баллов – хорошо/зачтено;

86-100 баллов – отлично/зачтено;

Особенности проведения процедуры оценивания результатов обучения инвалидов и лиц с ограниченными возможностями здоровья обозначены в рабочей программе дисциплины (модуля).

Уровни сформированности компетенций определяется следующим образом:

1. Высокий уровень сформированности компетенций соответствует оценке отлично:
 - предполагает формирование компетенций на высоком уровне;
 - знание теоретических разделов изучаемой дисциплины на уровне не ниже оценки отлично;
 - студент умеет применять на практике знания, полученные в рамках изучения дисциплины
 - формируются навыки использования теоретических и практических разделов дисциплины для решения задач профессиональной деятельности;
2. Средний уровень соответствует оценке хорошо:
 - предполагает формирование компетенций на среднем уровне;
 - знание теоретических разделов изучаемой дисциплины на уровне не ниже оценки хорошо;
 - студент умеет применять знания, полученные в рамках изучения дисциплины, для решения задач профессиональной деятельности;
3. Базовый уровень соответствует оценке удовлетворительно:
 - предполагает формирование компетенций на базовом уровне;
 - знание теоретических разделов изучаемой дисциплины на уровне не ниже оценки удовлетворительно;
4. Недостаточный уровень соответствует оценке неудовлетворительно.
